

Mississippi Rural Water Association

Water and/or Wastewater Certification Review Course

How would you like to improve your chances of passing the water and/or wastewater certification exam?

MsRWA will provide the operator's study guide, review materials, pencils and notebook paper.

All materials will be provided to the attendee on the day of instruction.

Please bring a calculator.

The Mississippi Rural Water Association has compiled a certification review course for those planning to take the short course exam. The course will be instructed by experienced MsRWA personnel. The course content has been structured based on various study guides for waterworks operator certification exams as well as the waterworks operator's manual.

The class includes a pre-test, followed by detailed instructions on the expected range of knowledge for the A, B, C, and D examinations and concludes with a practice exam.

The format is designed to help operators brush up on the many aspects of the exams and to assist individuals in the art of test taking.

Concentration will be placed on reviewing math skills, system maintenance, chlorination, sampling and other areas necessary to help study for your certification exam.

'017 Dates
