

WHY CHOOSE MSRWA?

The Mississippi Rural Water Association now has sewer televising equipment.

A sewer camera is used to diagnose and inspect many sewer problems.

The cable mounted camera is fed through the pipe and a live video picture is sent to the camera monitor.

DVD taping of the inspection can be provided so that the customer may retain a record of the inspection.

Possible Uses:

- Determining blockage location and cause
- Inspecting pipes for cracks and leaks
- Verifying septic tank integrity for certification
- Pipe inspection and preparation for trenchless pipe replacement.

If you are having difficulty with a sewer line and you need help, please call the MsRWA today.

ProCam DVD Ultra

Our State of the Art Sewer Camera with built in DVD recorder that we feed down sewer pipes allows us to visually inspect your sewer pipe.

Video Pipe Inspection - projects/transmits a visual image to an LCD monitor with DVD player/recorder that displays the condition of the line and locates line break-ages and obstructions.

Allows us to determine the extent of your sewer pipe problem without having to dig down to inspect the pipe.

Features of Camera:

- 200 feet of video push cable with water blocking gel
- Capable of inspecting a minimum of 2" straight pipe.
- 10.4 Color LCD Monitor
- DVD player/recorder
- Digital on screen foot age counter.

PRICES:

Short Distances

(Under 450 Feet)

\$150.00 per line plus mileage

Long Distances

(Over 450 Feet)

\$150.00 flat rate

Plus:

\$0.35 per foot and mileage

Possible Causes of Sewer Line Problems

- Root Penetration into the sewer line from trees.
- Collapsed or blocked sewer lines.
- Non-disposable items put into sewer lines.
