## BOIL WATER NOTICE

Date: \_\_\_\_\_  
Local officials have issued a precautionary "boil water" notice for people who get their drinking water from the \_\_\_\_\_ in \_\_\_\_\_ County.

This precautionary action is necessary because the system lost pressure. When a water distribution system loses pressure, contaminants can siphon back into the system. Public health officials consider any system that has lost pressure contaminated until tests of the water prove otherwise. As soon as pressure is restored to you, water system officials will begin collecting samples for testing.

When pressure is restored, officials recommend that you vigorously boil for one minute any water to be consumed. You will be notified when tests show water is safe. If you have any questions, please feel free to contact your water provider at:

#11

## BOIL WATER NOTICE LIFTED

Date: \_\_\_\_\_  
Local officials have lifted the "boil water" notice for people who get their drinking water from the \_\_\_\_\_ in \_\_\_\_\_ County.

Water from the system no longer needs boiling.

Multiple tests performed indicate the water now meets the standards of the Safe Drinking Water Law.

If you have any questions, please feel free to contact your water provider at:

#12

## SPECIAL NOTICE

To better serve you, your utility will be smoke testing the sewer lines. This is done periodically to locate leaks and breaks in sewer lines.

The smoke testing will occur sometime during these days and dates:

\_\_\_\_\_ between the hours of \_\_\_\_\_ to \_\_\_\_\_

The type of smoke used is white to yellowish-white and may have a slight odor. It is harmless to plants and animals. If the smoke gets into your house, please ventilate your house.

On the outside of your house or your neighbor's house you may notice smoke coming out of the:

- sewer vent;
- gutters and downspouts; or,
- out of the ground along the sewer line.

On the inside of your house, smoke or odor may come out of the plumbing and fixtures. This is an indication that dangerous gases and unpleasant odors from the sewer may enter your house. This should not happen if your plumbing is in good working order. You can minimize the chances of this happening by running enough water into the sinks, tubs and showers to fill the sewer trap with water. Don't forget floor drains.

Location, identification, and correction of the source of smoke entering your house or building is urgently advised. The correction of any defects on private property is the responsibility of the property owner.

If you detect smoke in you house and are uncertain about the cause, contact your utility at -

## NOTICE Delinquent Notice

The Water Provider listed below is required by State Law Senate Bill #3049 (2007) to discontinue your water service as of \_\_\_\_\_ (date), due to delinquent balance with a former water system.

Name of Former Water System: \_\_\_\_\_

Proof of payment on the delinquent account is required before the above date to avoid disconnection. If disconnection occurs, a charge in the amount of \$ \_\_\_\_\_ for reconnection fees will be required to restore service.

Reconnects are scheduled during office hours.
